Volume I, Issue I

June 2014

Healthcare Education Commission

- **Chair:** Dr. Lisa Smith
Associate Professor, Nursing
Indian River State College
Ft. Pierce, Florida
lsmith@irsc.edu
- **Chair Elect:**
Dr. Monica Franklin
Professor, Dental Hygiene
Florida State College at
Jacksonville
Monica.franklin@fscj.edu
- **Secretary:** Dr. Alice Serey
Professor, Nursing
Indian River State College
Ft. Pierce, Florida
aserey@irsc.edu
- **Legislative Liaison:**
Carolyn Lytle
Associate Professor, Nursing
Ghazvini Center for
Healthcare Education
Tallahassee, Florida
LYTLEC@tcc.fl.edu

Upcoming Event

Annual Fall Convention

Dates: October 29-31, 2014

Location:

Sandestin Hilton, Destin, Fl

For More Information:

calendar-of-events](http://www.myafchome.org/calendar-of-events)

Reasons to Attend:

- ⇒ Exemplary Practices Presented
- ⇒ Tradeshow with exhibits
- ⇒ Diverse educational programs
- ⇒ Recognitions and awards
- ⇒ Networking

2014 HEC Exemplary Practice Winner-Dr. David Sullivan "Student-Centered Engagement: Building Patients and Student's Higher Order"

Pasco-Hernando State College Health Occupations faculty identified a deficiency in student preparation for classroom learning. As a result, faculty implemented creative, student-centered learning activities that impose real-time, relevant application of content. Students are learning in the classroom, which reinforces student skill in the cognitive, psychomotor and affective domains.

Building patients, medications, and creating medical disorder activities for each learning session offers a timely, fun-filled and creative way to ensure students are prepared to apply what they learn in a collaborative effort. Students also present to the class during each learning session. This approach to student-centered learning has significantly improved student confidence, responsibility for preparation,

as well as learning the value of time, and the importance and effort as it applies to the health care learning environment.

Dr. David Sullivan

Building Student Engagement Activities evolved as an educational tool to:

1. Increase student engagement in the classroom,
2. Encourage students to read the text book before class,
3. Use it as a resource to encourage collaboration and engagement of student groups,
4. Create patients and health conditions from scratch.

The student-centered learning tools allow students to create patients and conditions as they relate to what students have encountered or will encounter in the health care learning environment.

These activities allow quick-learners and students who need more time and practice to evolve and contribute equally to the collaborative learning efforts in class.

Other Presentations Submitted

1. "Safe Patient Handling" - Christine Lisle & Dawn Roe-Lake Sumter State College, Leesburg Campus—Contact Info: LisleC@lssc.edu , LaRoeD@lssc.edu
2. "Breaching the Gate: Nursing Care of Military and Veteran Populations" - Dr. Beth Norton, Dr. Marty Walker, & Dr. Teresa Ryan — Northwest Florida State College, Niceville Campus – Contact Info: nortonb@nwfsc.edu , walker@nwfsc.edu , ryant@nwfsc.edu
3. "Back to School for the Freshman 40: A Case-Based Model of Advising" - Ms. Mollie Rhodes, Ms. Cara Good, & Ms. Joan Roberts—Palm Beach State College, Lake Worth Campus—Contact Info: rhodes@palmbeachstate.edu , goodc@palmbeachstate.edu , robertjm@palmbeachstate.edu
4. "The Impact of 2D/3D Images (Body Viz) on Anatomy and Allied Health Courses Instruction" - Dr. Juan Guzman, Dr. Doris Lombo, & Dr. Gabriel Pardo—Florida Gateway College—Contact Info: juan.guzman@fgc.edu , doris.lombo@fgc.edu , gabriel.pardo@fgc.edu
