

**Virtual Conference via Zoom  
Wednesday, September 30, 2020**

**Agenda**  
CCP Credits – 2

**#AFC2020Vision**

**9:00 AM - 9:50 AM – Opening General Session**

***Panel Discussion with Florida College System CIO/CISOs: Navigating IT Issues During COVID***

**Moderator:** Matthew White, Director of Distributed Systems, Chipola College

**Panelists:** Patti Smith, Chief Information Officer, Valencia College; Guy Albertini, Information Security Officer, Palm Beach State College; Dennis Everett, Associate Vice President of Information Systems, Chipola College

**10:00 AM - 10:50 AM – Breakout Session 1**

**1. *Strategic & Tactical Considerations for Improving Your Cyber Security Posture in Your Campus and Organization – Anthology***

Campuses are struggling with effective cybersecurity. While education lags behind industries such as finance, healthcare and public administration in total breach volume, Verizon's "2019 Data Breach Investigations Report" noted an uptick in both the volume of confirmed data disclosure attacks in education — 99 of 382 incidents — and in the variety of threats. During this talk, we will speak with experienced CIOs and CISOs about the strategic and tactical musts that Higher Ed. organizations should consider implementing to sustain a viable cyber security protection strategy. Lastly, we will touch on how digital divide is being brought to light with COVID and how this presents a challenge in cyber security.

**Presenters:** Angela Polania, Principal of Elevate; Richie Rodriguez, Chief Information Security Officer at Anthology, Inc.; Mauricio Angée, Certified Information Systems Security Professional; Dr. Hernan Londono, Associate Vice-President for Information Technology and Chief Technology Officer (CTO) at Barry University; Patrick J. Doliny,

**2. *Identity Management - Planet Technologies***

If your running Office 365, your using Azure Active Directory (AAD) for authentication. In this session, we will discover how AAD can be enhanced to provide top in class security and in addition provide Single Sign On (SSO) for 3rd party Cloud solution and even on-premise applications.

**Presenter:** George Scott, Cloud Strategist, Planet Technologies

**11:00 AM - 11:50 AM – Breakout Session 2**

**1. *Windows Virtual Desktop – Planet Technologies***

Windows Virtual Desktop is an Azure based solution for virtualizing applications and the desktop experience. The following session will cover the key benefits of deploying Windows Virtual Desktop in an education environment and a brief demo.

**Presenter:** Jerry Lambdin, Senior Consultant

**2. *5 Critical Components of a Successful CISO – EC-Council|Academia***

Top-level information security leaders must focus on both technical skills and information-security management strategies to prevent potential cyber-attacks from arising and harming an organization. This takes both skill and leadership, especially while maintaining an organization’s goals and strategy. The most critical aspects of an information security program can be broken down into 5 domains. These are the foundation of a successful CISO and play a vital role in creating and leading a team of technical professionals to defend organizations by reducing cyber-risks, responding to incidents, establishing controls, and establishing and implementing policies and procedures.

**Presenter:** Keyaan J Williams, Founder of Cyber Leadership and Strategy Solutions

**12:00 PM - 1:45 PM – Vendor Fair and Lunch**

**2:00 PM - 2:50 PM - Breakout Session 3**

**1. *Cyber-Secure Video Surveillance, Body Temperature / Mask Verification and Incident Management - Geutebruck USA, INC***

This session is intended for those in positions of Campus, Student and Faculty Safety and Security decisions. Observational and Intelligent IP Video Surveillance is a vital asset in today’s Campus environments. This PowerPoint Presentation delivers key elements of systems available and their ability to integrate with other physical security technology.

**Presenters:** Mr. Terry Ottinger, President, Geutebruck USA, INC; Curtis Nance, Southeast Regional Manager Geutebruck USA, INC

**2. *Cultivating a Successful Student Journey – Anthology***

This session presents ideas to cultivate and encourage successful student outcomes. We will specifically address the support for guided pathways and the ability to put the

power of a robust program completion audit into the hands of advisors and students. We believe in supporting a holistic student experience with personalized plans and outreach and will demonstrate how those plans can also drive positive reinforcements for students on their journey. Finally, we will show examples of institutions that are successfully aligning skills taught in class to skills needed in the workforce.

**Presenters:** Raymond Todd Blackwood, Vice President, Product Management Anthology; Jennifer Beyer, Vice President Product Management Anthology

**3. *Ransomware and Data Destruction: Best Practices To Counter Modern Cyber Threats* – Dell Technologies**

Cyber criminals are everywhere with increasingly sophisticated attacks. Traditional business continuity and disaster recovery planning are not enough. The only way to minimize the impact of a disruption is to prepare for it. Dell's PowerProtect Cyber Recovery provides an air-gapped solution providing comprehensive protection against Ransomware, malware, and insider threats.

**Presenter:** Mr. Jim Shook, Director, Cybersecurity and Compliance Practice, Dell Technologies, DPS Global Technology Office, Dell Technologies

**3:00 PM - 3:50 PM**

**CIO & CISO Meeting**
